## METH MOUTH

### TOOTH DECAY IS CAUSED FROM:

- METH's acidic nature
- Dry mouth, reducing protective saliva
- Craving for high-calorie carbonated beverages
- Grinding and clenching of teeth
- Poor oral hygiene
- Depriving the body of proper nutrition

## METH BUGS

The toxic nature of METH may cause users to experience a sensation of bugs crawling under their skin.

Users pick at these areas causing open sores. This activity can cause:

- Infection
- Disfiguration
- Scars
- Skin Sores
- Strong body odor

## FRIENDS & RELATIONSHIPS

Doing METH not only causes your body harm, but may lead to harmful associations and exposure to:

- HIV - STD's
- Hepatitis
- Hanging with the wrong crowd
- Crime and violence
- Incarceration

## RAPID AGING AND BODY DETERIORATION

METH is so toxic it can cause permanent organ damage. Not only does METH destroy your teeth and physical appearance, it can destroy your mind and internal body, such as:

- Nasal passage
- Heart
- Liver
- Lungs
- Neurological damage
- Short/long term memory loss
- Dry, itchy skin
- Loss of appetite
- Malnutrition
- Convulsions, twitching, jerking
- Teeth
- Blurred Vision
- Stroke
- Death
